

Premium MH-75 mud gate valve kits are cross compatible with legacy Anson disc profile mud valves. Each kit includes replaceable seat rings that take on the wear instead of the valve body, extending the service life of the valve. All Premium kits use high quality parts and materials including stainless steel seats and inserts, and nitride hardened stainless steel gates. Seats are made with a long-lasting elastomer bonded to two stainless steel inserts and a locking device that ensures proper alignment during installation. All MH-75 style kits are good for service conditions up to 7,500 psi.

## BENEFITS

- ◆ Repair kits are interchangeable with our competitors on a part to part and unit to unit basis.
- ◆ Stainless steel trim is standard on all valves, for high performance in corrosive applications.
- ◆ Major and minor spare parts kits are available.
- ◆ Available with Patriot™ ultra-high-performance elastomer seats. Extends life approximately 30% longer than OEM seats.

| Part No.         | Description                                                                           |
|------------------|---------------------------------------------------------------------------------------|
| 501-6270 - KIT   | Kit, Major Repair, Gate Valve, 5", 7500 psi, Anson, 410SS Trim, NACE                  |
